

TRN-ST

Specialized Tracks and Courses

SECC provides quality training with the following main objectives:

- Increase technical and managerial skills of software and IT service management personnel
- Promote and support applying software and IT service management standards and best practices
- Transfer knowledge about specific frameworks, processes, and models as CMMI® and ITIL®
- Transfer high-tech, state-of-the-art technologies
- Influence academic curriculums in computer science and software engineering to meet current needs and future trends

SECC's training courses are divided across the following tracks:

- Executive and Top Management
- Software Development Methodologies
- Object Oriented Software Development
- Software Quality Engineering
- Systems Management Improvement
- Software Process Improvement (SPI)
- SPI for SMEs
- Software Testing
- CMMI® for Development
- CMMI® for Services
- Embedded Systems
- Information Technology Infrastructure Library (ITIL®)
- Systematic Reuse
- Six Sigma
- PSPSM/ TSPSM
