

# Egyptian Java Users Group

Presented by Osama Oransa

EGJUG Co-founder

# Java

- Java is the most popular programming language for many years with the most active supporting community.
- Java is open source programming language based on open standards.
- Java is platform independent, compile once run everywhere.
- Java is backed with multiple vendors, no vendor lock-in.

# Open Sources

## Develop

- Develop using Open Source IDEs
- Open Source Frameworks e.g. Struts, Spring, ..etc.

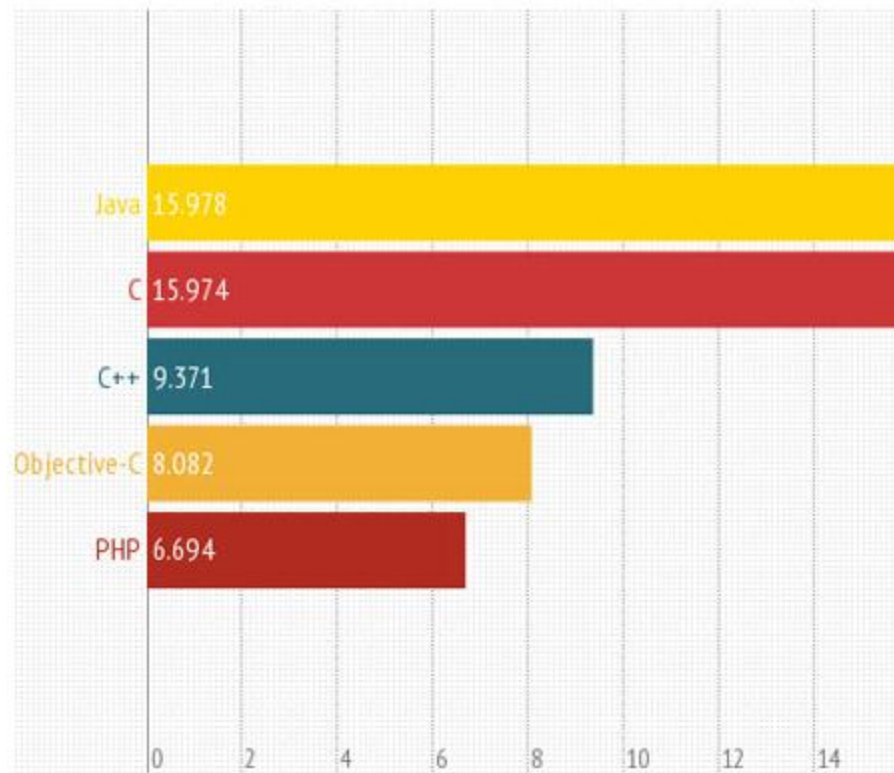

## Deploy

- Deploy using Open Source Software
- JBoss, Oracle Glassfish, Linux, MySql, Postgres Database, CloudShift.

## Test

- Test using Open Source Test Platforms
- JUnit, Apache JMeter, SOAPUI.

# Top 5 programming languages

Percentage of searches for programming languages in August 2013, according to Tiobe Programming Community Index

Today, it's hard to remember a world before the internet. Yet the basic tools of our daily lives were made possible by a perfect storm of research, technology innovations, and opportunity in the early 1990s that forever changed the way we do business, communicate, stay informed, and collaborate across our companies and around the world.

One of the integral components of the internet revolution dates back to 1991, when Sun Microsystems assembled a small group of engineers to explore opportunities in the consumer electronics industry. Part of the experimentation that followed involved the creation of a language that would allow a heterogeneous network of consumer electronic devices to communicate with each other. That language became Java.

Twenty years later, the effect that Java has had on our world is stunning.

Java powers computers, printers, routers, cell phones, e-readers, parking meters, vehicle diagnostic systems, ATMs, government IDs,

# Java Users Group

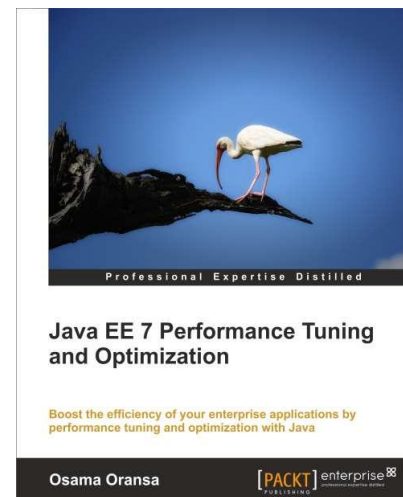

# Egyptian Java Users Group

- Founded on 2005.
- 3000+ members.
- Biggest JUG in Africa and Middle East.
- Recognized regionally and globally.
- Organized 5 international conferences (Java Developers Conference).

# Egyptian Java Users Group

- EGJUG is member of JCP, the organization which drive the Java technology.
- EGJUG members have contributions to Java open source technologies and open standards.
- EGJUG members contribute in writing different Java books.

# Egyptian Java Users Group

**Training courses**

**International conferences**

**Monthly meetings**

**Capacity Building**

**Job seekers**

**Promoting local experts**

**Supporting companies growth**

**University Tours**

**Entrepreneurship**
